

SPI protocol

Артём Дубровских | May 28, 2020

Transmitter's SPI message

1 byte	1 byte	1 byte
message's number	command or channel #	hash

Receiver's SPI answer (to the next status check)

1 byte	1 byte	1 to 127 bytes	1 byte
message's number (same as transmitter's)	status	received payload (or just 0, if no payload received)	hash

Command delivering protocol:
